🛡️ Repo Shield Security Report

Repository: https://github.com/hsliuping/TradingAgents-CN
Scan Time: 2026-03-26
Total Findings: 155

📊 Executive Summary

This repository contains **155 potential security issues**, including:

- 🔴 55 Critical Issues (possible secrets / credentials)
- 🟠 11 High Risk Issues (unsafe patterns)
- 🟡 89 Medium Risk Issues (dependency risks)

👉 Immediate attention is required for **credential exposure and secret leakage**.

ℹ️ Note: These counts come from the static scanner/AST layer and represent *suspected* risk before AI review. See the 🤖 AI Audit section for confirmations and false-positive explanations.

📈 Risk Breakdown

Severity (pre-AI)	Count
🔴 Critical	55
🟠 High	11
🟡 Medium	89

📦 Dependency Risks (Aggregated)

⚠️ Found **89+ unpinned dependencies**

Example:

- @element-plus/icons-vue@^2.3.1
- @types/sortablejs@^1.15.8
- @vueuse/core@^10.7.0

👉 Risk:

- Unexpected breaking changes
- Supply chain attacks

🤖 AI Audit

⚠️ Note: The following manifest/lock files are *not* sent to AI for auditing and are reported based solely on static scanner/AST analysis. Only manifest/lock files flagged as high risk (secrets / very high-entropy strings) are included in the AI audit. When these files show only medium or low risk issues (for example unpinned dependencies or integrity hashes in package-lock.json), they are generally considered safe metadata rather than true code-level vulnerabilities.

- package.json

AI audit was not executed for this run (scanner-only mode or no files selected).
